[Note to the Public: The E/M adjustment factors proposed below are the ratios that were determined by the Lewin Group through the Practice Expense study. The ratios reflect the increased physician work and practice expense that are involved in providing Evaluation and Management services to workers' compensation patients. The table below is an excerpt of the Lewin Group's table in the Practice Expense Study. Lewin's draft studies can be found on the Industrial Medical Council's website at: <a href="http://www.dir.ca.gov/IMC/imchp.html">http://www.dir.ca.gov/IMC/imchp.html</a>.

The proposal is to compensate physicians for the additional work involved in workers' compensation E/M services by applying the adjustment factors to the RVUs established by CMS. Some members of the public have feared that increase in E/M reimbursement would lower other relative values. However, under the current proposal the E/M adjustment factor would NOT reduce the value of other services.]

## § 9788.11 Evaluation and Management Practice Expense Adjustment Factors
